## ROOM-DARKENING BLINDS

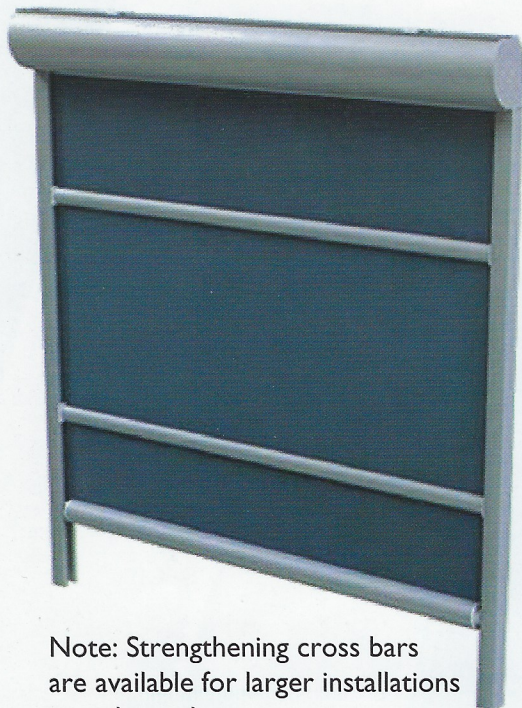

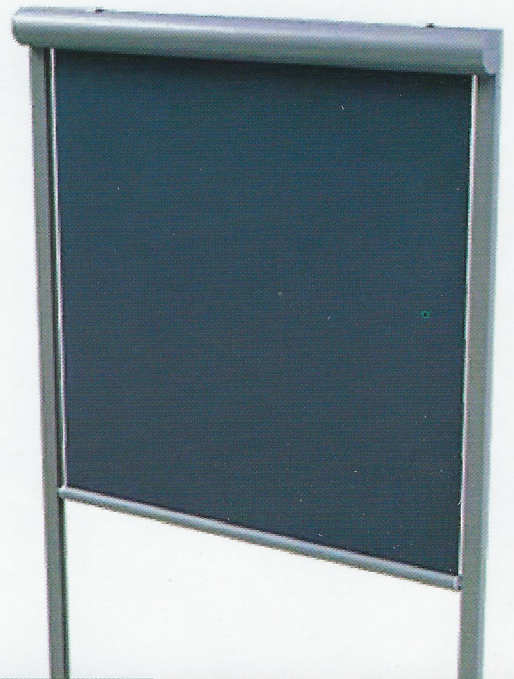

**The Ebony range of compact boxed dark blinds are ideal for applications which require cost-effective room-darkening solutions.**

The attractive range of 100% blackout fabrics will match with most décor needs and the manual or motorised operation provides a variety of options for every application.

## ebony 76

Ebony 76 is an aesthetically compact design utilising a 76mm diameter cassette. This feature makes this blind ideally suited for children's bedrooms and home entertainment rooms.

- *Cassette dimensions: 76mm x 76mm*
- *For internal use*
- *Maximum blind dimensions: Width 2.6m – Height 2.6m*
- *Manual or motorised operation*
- *Exposed aluminium is powder-coated RAL9010 white*
- *Variety of 100% blackout fabrics*

Note: Strengthening cross bars are available for larger installations – as shown here

## ebony 103

The Ebony 103 textile roller blind is ideal for multi-use lecture theatres, school classrooms and audio-visual meeting and conference rooms, where the robust construction and ease of use make this blind an ideal room blackout solution.

- *Maximum blind dimensions: Width 4.5m – Height 4m*
- *Cassette dimensions: 103mm x 117mm*
- *Manual or motorised operation*
- *Exposed aluminium is powder-coated RAL9010 white*
- *Variety of 100% blackout fabrics*
- *Also available with a 'lock' bottom bar for external applications (using motor)*
- *Strengthening cross bars also available for larger installations*

## COMPARISONS AT A GLANCE

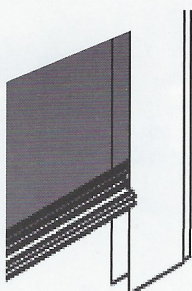

To give a clear indication of the most appropriate application for your installation, shown here is a general comparison table.

PRODUCT	Cassette	Maximum blind size		Suitability		Manual/ Electric	Fabrics
		Width	Height	Internal	External		
<b>Ebony 76</b>	76mm x 76mm	2.6m	2.6m	✓	✗	Both	Both products utilise fabrics from the EBONY GUARD and EBONY 550 BLACKOUT ranges
<b>Ebony 103</b>	103mm x 117mm	4.5m	4.0m	✓	✗	Both	
<b>Ebony 103 Lock</b>	103mm x 117mm	3.0m	2.0m	✓	✓	Electric	

## GENERAL INFORMATION

Other useful features of the Ebony range of room-darkening blinds:

- For both models the cassette boxes are fabricated in two parts for easy access.
- The side guides are 80mm x 23mm extruded aluminium sections for fabric stability.
- All exposed aluminium parts are white polyester coated RAL9010 as standard. (Other RAL colours can be made available on application.)
- Blinds that are manually operated are done so through an aluminium crank-operated rod, ensuring the product's safe use in all domestic and educational applications.
- All blinds can be motorised with control by either a simple switch or remote control. (See data sheet for options.)

## FABRICS

The attractive range of 100% blackout fabrics include 8 colour options to match with most décor needs.

All fabrics are double-sided and available in two thicknesses; **250 micron** (EBONY GUARD); and **350 micron** (EBONY 550 BLACKOUT).

All fabrics meet BS 5867 – 1980, Part 2, Type B fire retardant specifications.

EBONY 550 BLACKOUT

EBONY GUARD

Note: The fabric colours shown here are illustrative only. Full swatches are available on request.
